

William Eucker's webpage:

How to Vogue:

I want to make multiple pages, maybe with a drop down menu to navigate to each page. There will be lots of photos and videos and text to address this topic.

Page 1: video of the dance-introduce it to the viewer
(Maybe have 2-4 as menu options?)

Page 2: History of the dance form. Use photos and text.

Page 3: Different styles of the dance used throughout history. Maybe video tutorials on this page

Page 4: Artists who have been inspired by or actually vogue (think Madonna). Include video links on this page
